

Adding MicroBloc to your mural is ideal for all commercial uses, especially:

- Healthcare Facilities
- Hospitals
- Hotels
- Medical Facilities & Clinics
- Washrooms
- Daycare Centers
- Much more!

MicroBloc Antimicrobial Topcoat

Wherever bacteria, mold, mildew and fungi compromise product performance, MicroBloc Antimicrobial Topcoat will take control. MicroBloc inhibits the growth of bacteria and fungi responsible for creating unpleasant smells, staining and deterioration of our printed wall mural materials. By controlling unwanted microbes, MicroBloc helps keep your printed wall mural fresh, clean and odor free.

Safe, Effective, Responsible

MicroBloc successfully passed the most stringent testing procedures for safety and efficacy to meet international guidelines. The ingredients of MicroBloc are US EPA registered, BPR compliant and Oeko-Tex listed, and complies with all regulatory requirements of each country where it is sold. In addition to providing premium quality products, we are committed to using environmentally sustainable antimicrobial treatments. Acknowledging our social responsibility, our technology supplier has partnered with bluesign® in their joint initiative for the removal of harmful substances and practices from the manufacturing process.

What are the Benefits of MicroBloc?

Selecting MicroBloc Antimicrobial Topcoat for your printed wall mural in healthcare facilities, dental offices, hotels, washrooms and more will:

- Resist product deterioration caused by mildew and mold fungus
- Inhibit discoloration on the product caused by mildew, mold and algae
- Guard against the growth of bacterial odors on the product

We have combined the antimicrobial benefits of MicroBloc with our polyurethane topcoat to provide surface protection for your printed wall murals. This protection extends the life of your mural. It is recommended for murals that will need to be cleaned often or are in high traffic areas where they may be rubbed or touched on a repeated basis. Polyurethane topcoat is also recommended for commercial applications. Please note that if you choose MicroBloc or our regular polyurethane topcoat for our Prepasted Wallpaper, the removal is not as clean as without topcoat and may cause damage to your wall. MicroBloc and our regular polyurethane topcoat are not available for SmartStick peel-and-stick murals.

At \$2.00 per square foot, MicroBloc is a great way to add long lasting antimicrobial protection to your wall mural.

MicroBloc Antimicrobial Topcoat must be ordered by phone. Email us at sales@muralsyourway.com or call **1.888.558.0279** to speak with a mural consultant about adding MicroBloc Antimicrobial Topcoat to your mural.
