

CARE & MAINTENANCE

Satin Linen Wall Covering

As with any quality wall covering, proper care and maintenance will extend the life of the wall covering to help maintain its original finish.

Ordinary dirt spots may be removed with a mild soap and warm water. Clean from the bottom of the wall upward to protect the baseboard and prevent streaking. Rinse thoroughly with clean water from the top down using a sponge. Blot wall covering dry with a soft, lint-free towel. Try a small subtle spot first before attempting the entire wall.

Not recommended for cleaning the wall covering are abrasive cleaners as they may mar the surface. Do not use active solvent based cleaning agents, lacquer thinners, nail polish remover, pine oil or cleaning agents containing bleach as they will remove print and/or finish from the wall covering.

To extend the life of the wall covering, apply a thin layer of water based polyurethane by rolling it onto the installed wall covering. This can be repeated once a year for added protection.
