

CARE & MAINTENANCE

Prepasted Wallpaper

As with any quality wall covering, proper care and maintenance will extend the life of the wallcovering to help maintain its original finish.

Ordinary dirt spots may be removed with a mild soap and warm water. Clean from the bottom of the wall upward to protect the baseboard and prevent streaking. Rinse thoroughly with clean water from the top down using a sponge. Blot wall covering dry with a soft, lint-free towel. For more difficult stains that are only surface deep, the use of a stronger detergent is recommended. Try a small subtle spot first before attempting the entire wall.

Not recommended for cleaning the wallcovering are abrasive cleaners as they may mar the surface. Do not use active solvent based cleaning agents, lacquer thinners, nail polish remover, or pine oil as they may remove print and/or finish from the wallcovering.

To extend the life of the wallcovering, apply a thin layer of water based polyurethane by rolling it onto the installed wallcovering. This can be repeated once a year for added protection.
