

USABLE FILE TYPES

- RAW – All Camera RAW file types (Raster Image)
- TIF – Layered is best (Raster Image)
- PSD/PSB – Layered is best (Raster Image)
- AI – Vector Image
- EPS – Vector Image
- PDF – Vector and/or Raster Image. (If using both vectors and raster images, send raster images along separately also.)

COLOR PROFILE

- RGB – ADOBE RGB (1998)
- CMYK – U.S. Web Coated (SWOP) v2

SIZE

- Minimum size (depends on final size)
- Pixels 3800 px high
- Inches 13” at 300 dpi (ppi)
- File size (depends on final size)
- Uncompressed (RAW, TIF, PSD) - above 40mb
- Compressed (JPG) - above 4mb

SENDING MULTIPLE FILES

- ZIP file
- RAR file

LAYOUT OF MURAL CREATED BY CUSTOMER

Photoshop (PSD)

- Create file at the size you want the mural to be. (Example: 76” wide by 48” tall)
- Resolution of the file, created at the size wanted, needs to be at least 40 dpi/ppi and not over 150 dpi/ppi

Illustrator (AI, EPS, or PDF)

- Create file in scale of the mural wanted. (Example: 144” wide by 96” high = 14.4” wide by 9.6” high)
- If using pictures in a vector file, please send pictures separate to be enlarged before printing
- If using text, please provide us with the font file or name of the font, or create outlines before sending

InDesign

- Create file in scale of the mural wanted. (Example 12’ wide by 8’ high = 12” wide by 8” wide)
- Send complete package with all linked files and fonts (this will make a folder and add all images and fonts to that folder with the InDesign file). To do this, go to: File>Package, then ZIP or compress the folder and send
